# WELCOME from Crossroad Farms

Welcome to our 19th Annual Bull and Female Sale. Different than most, the third Wednesday of February acts as our "New Year" annually. A day we anxiously anticipate as we spend 365 days preparing for it. Writing this piece of the catalogue is a time for us to reflect on the year behind us. 2024 was another great year for our family. The bull sale was one of best, we were fortunate to receive a copious amount of rain, pasture grass was as good as it's ever been. We followed the kids to Weyburn for the Saskatchewan YCSA and then to Olds for the World Simmental Congress which was a definite highlight to our year as we got to catch up with many friends and customers. Harvest was slow going, it was a whole family effort to get the crops off. The cattle industry is better than ever and prices are reflecting the hard work we all put into it. As we roll into calving, the weather has been promising and the calf crop is as exciting as ever. And at the top of the list, Jody continues to be in remission which is always something we celebrate.

As the kids grow up and we grow older, roles are slowly changing around here and it is inspiring to watch. Having 3 generations involved keeps us moving in new and exciting directions while maintaining the values Crossroad Farms was built on.

The Crossroad kids are growing up fast before our eyes. Olivia hung up the softball cleats and transferred to South Dakota State University to finish up her degree and join the livestock judging team. Shelby is in her second year of Agronomy at the University of Saskatchewan – the school workload is heavy, but she still finds weekends and holidays to come help us out on the farm. Jaici is currently in grade 12 and figuring out her post secondary path for next year. Cooper is currently in grade 10 and is still asking to quit school and work on the farm every day.

Our staff is essential to our success. A huge thank you to our employees Claude and Kirk. Both of these men take enormous pride in their work here. Work is never "work" with these two around and we are always so grateful for the laughter and the long hours they put in.

A thank you to Ian Wasden for once again clipping all our sale animals and doing nights during calving for us once again. We would like to send a heartfelt thank you to Claude Wasden, who has decided to put down the clippers – thank you for the years of clipping and friendship.

As for the set of bulls on offer, the consistency is unmatched. With a large group of ET calves, striking natural sons, and proven crosses, the result has been exciting to witness. The large group of fullbloods is more intriguing than ever with the most polled bulls we have ever offered. Our females in production continue to suit our values. There is certainly no absence of power, structural correctness, and dependable fertility. The bulls relay these notable attributes loudly. A set of easy fleshing, genetically proven, fluid moving bulls that are going to excel at their given task. With a wide sire group on offer, there are options for anyone and everyone. It is our goal as a family to keep our program values strong, and this set of bulls is an exemplary model of that.

We invite you to come view the bulls and the females backing them anytime before the sale. Take your time in the pens looking over our offering. We will be available to answer any questions you may have and the coffee is always on. Videos will also be available online in early February.

If you are unable to attend the sale, give us a call or you can contact the capable staff at Bohrsen Marketing to bid on your behalf. DLMS will also be available for online bidding.

We invite you to come early on sale day and enjoy a home cooked meal and some Crossroad hospitality before and after the sale.

**Insurance: Steen Agencies will be in attendance or can be contacted at (306) 887-2020; Cell: (306) 961- 6359, Email: [nhawres@steenagenciesinsurance.com](mailto:nhawres@steenagenciesinsurance.com). Each animal becomes the risk of the purchaser as soon as they are sold. ALL BULLS STAYING AT CROSSROAD FARMS UNTIL DELIVERY MUST BE INSURED.**

**Videos:** Sarah Hasson, Golden Thread Images, (306) 681-5340

**Catalogue Design:** Cattlepics.com, Patricia Shewchuk (780) 603-3066

**Crossroad Farms 100% Guarantee:** All bulls are guaranteed to be satisfactory breeders in accordance with the Canadian Simmental Assoc. guidelines. Should a problem occur barring physical injury or mismanagement, a bull of equal value will be provided or a credit will be issued towards the purchase of another bull. We always have back-up bulls for our customers and we guarantee you will have a bull to service your cows.

**Delivery:** Free delivery in Alberta, Saskatchewan and Manitoba to central points, we will try our very best to deliver them right to your yard. Cost shared arrangements can be made to other destinations. Delivery date is at the seller's convenience, most will be delivered mid-March to mid-April.

**Welcome U.S. Buyers:** The U.S Exchange rate will be announced prior to the sale. Crossroads will assist with all necessary health testing, vet examinations, paperwork at cost. We will arrange trucking and provide delivery to the border.

**Semen Reserve:** Crossroad Farms reserves the right to collect semen for in herd use only on any bull in our sale. Semen would be collected at Crossroads expense and buyers convenience.

**EPD Explanation EPDs are “Expected Progeny Differences”:** They are a useful tool in selection. EPDs incorporate the individual animal with its ancestry performance. EPDs do not compare across cattle breeds. They are individual based per breed. EPDs indicate a probable variance above or below breed average for that trait for a given bull's progeny. The accuracy of EPDs for calendar year bull calves is generally about 20% (one out of five times) so use it cautiously as one of several selection tools.

## Health

Dr. Blair Simonson continues to do exceptional reproductive work from semen testing to embryo work for us. We would also like to welcome our new local vet, Dr. Justin Hodgson, Farm Docs in Spiritwood that looks after our overall herd health. It is very reassuring to have both of these dependable Veterinarians on our team.

Crossroad bulls are developed on a TMR ration consisting of cereal silage, chopped hay, super oats and a custom formulated bull supplement. This ration will optimize longevity and ensure proper development from mass and structure to testicle development. All bulls will be vet checked, scrotal measured and semen tested. Bulls were treated with Selon E, Vit. AD, Tolyrazuril, Nasalgen as baby calves.

June - Fermicon7/Somugen, Vista Once;  
 Sept. - Vista Once booster, Ivermectin;  
 Dec. - Sabre for lice, first shot of Fusogard for footrot and a second dose prior to delivery. Sale day weights will be posted.

It's the ones like this that make the business entertaining. An outright sight to see, Crossroad Ultimate 74M boldly speaks for himself. The sheer shape this bull encompasses is unlike any other. The colour, hair, mass of bone, profound depth, and immense width from top to bottom is admirable. Behind him is a genetic combination of excellence that correlates to the stunning set of EPDs, finding himself in the top percentages of the breed. A son to the \$32,000 SAS Northbound J993 who we lost after his first breeding season, the opportunity to buy into these genetics is limited. His dam, Crossroad Julia 66J has proven her worth, especially after this one. Exhibiting a picture-perfect udder, ample frame, and the maternal strength to raise one like this. At 10 months old, Ultimate froze semen only adding to his list of greats. His package of unprecedented traits, limited pedigree, and stellar EPDs have him pegged to make a significant impact in the industry. ~Homo Polled~

Upwards sire was purchased from Springer Simmentals in Iowa as an off-age specifically to use on first and second calvers. He has certainly left us some impressive sons and daughters. Be sure to check out the Northbound daughter in our heifer offering, she is special. Upward offers calving ease, performance, and cow power, all in one genetic package. His dam is a strong uddered Connected daughter that puts everything she has into her calf. Upward stands proud in his stature with thickness throughout, presenting lots of eye appeal with a great hair coat and pigment. Lots of options to think about here when you are looking for your next herd sire. ~Homo Polled~

We sure wish we had more Northbound sons on offer, these three are all unique in their own ways. U-Turn was born to a heifer who did an excellent job raising her first calf. He is long-bodied, accounting for a little extra birth weight, but was born unassisted. He is solid in his structure with big testicles when we measured in early December. Excellent growth here, something to consider knowing you would benefit from increased weaning weights while injecting maternal values into your replacement heifer pen. ~Homo Polled~

Stout, square-hipped, and tanky. If this bull doesn't scream pounds to you, we aren't sure what does. With an actual weaning weight of 918lbs and a 1643lbs 365-day adjusted weight, this powerhouse is going to stamp his calves just like him. His pedigree accounts for his impressive make. His grandam, Crossroad 430D is active in the donor pen, her natural calf, lot 5 exemplifies her ability to produce. The star face, utmost masculinity, unmistakable shape, and infinite width have this bull pegged high in our books. ~Homo Polled~

We have two Stratton sons for you again this year and we sure are impressed with their builds. Ventura has been a real standout since birth, showing tremendous promise all summer, and has surpassed our expectations at this point. He is extremely stylish with his dark-coloured hair coat. Superb in his structure with excellent testicle development. His dam has made her presence known through the progeny she has produced. All three of our Dusty daughters are productive, good-footed, and dependable. They are the mothers of Lots 4,6 and 9. She was flushed after this calf was born and caught back for a January calf. We bought a share back on the full brother to Ventura with the intention of expanding this tremendous producing cow family. Ventura is an outstanding individual with proven traits and qualities you can trust. ~**Homo Polled**~

A real herd bull prospect here that seems to have it all. Wide over the top, big barrelled, ideal colour, structure, and disposition too. We certainly appreciate the quality the Stratton genetics have given us over the last few years. His progeny have all been very similar in type; honest, reliable, and functional. If you are looking for a bull with traits from a super strong cow family, this is one of our most valued. Vista's dam is also the daughter of the Lot 5 matriarch making these two Stratton sons closely related. Which one is the best? That will be a tough choice, either way you choose, know that you picked a good one! ~ **Homo Polled** ~

Always nice to see when a set of twins can make it into the sale and look at the performance! Shelby said these Lot 7 and 8 brothers were easy to picture with the natural muscling they exhibit and at just 11 months of age. They are sired by a power-packed polled full fleck bull we raised. His calves are impressive and we continue to sprinkle his genetics throughout the herd. These brothers have more than adequate testicle development at this stage of their lives and if their upward growth trajectory continues, they both will be more than ready to show their qualities by sale day. ~ Homo Polled ~ Diluter Free~

Great colour with that all-important money stripe just like his Lot 7 twin brother. Lots of shape and dimension to these brothers' desirable body types ensure that they will pass on their early maturing genetics to their progeny. We purchased their fancy dam from LaBatte Simmentals and she is sure paying her way around here. Her first calf sold in last year's bull sale for \$12,000 to Aiken Farm & Ranch. These impressive twins haven't slowed her down either, she's due for another January calf. Some next-level genetics here that will leave consistency and quality to the calves they sire. ~ Homo Polled ~ Diluter Free~

Sure didn't know when the kids told me to write Shapeshifter on this baby calf's tag that he would have this much SHAPE when he grew up! From his well-defined rear quarter to the depth of his flank, ample capacity through his middle, and then down to his solid feet, this guy is hard to fault. Great hair and large testicles on this first of eight Sysco sons we have for you this year. Sysco is a real game changer injecting exemplary muscling into the calves he sires. Shapeshifter's dam also factors big time into this soggy bull's quality, all her calves are January born, and she is a daughter of our prolific producing Dusty cow. The dams of Lots 4,5 and 6 are also Dusty daughters making it evident that the maternal strengths in this cow family can really feed a calf. Pictured here on November 28, Shapeshifter is a bull that commands attention and will no doubt be easy to find on sale day. ~ Homo Polled ~

Here is a moderate birth weight Sysco son that has lots to him, length, muscle expression, testicle size, and is super stylish with that white face. His transplant Spartacus dam has always had small calves at birth. Her last year's son sold at our bull sale was a full sibling to Strata and a daughter is the dam of the Lot 3 bull. This Spartacus X Sysco combination is undoubtedly one of the most impressive groups we have ever offered over the years. These two sires have made their mark in our herd with the mass and power they pump into their progeny. He has a balanced set of EPDs and a ton of proven traits; he will ensure consistency you can rely on. ~ Homo Polled ~

Here is an excellent Sysco son mothered by a Kill Switch dam that has been a consistent fertile producer with all her calves born in January. This is her fifth son to be selling in our bull sale. Her previous progeny have all been standouts and sold to prominent cattle producers. She's only ever had one daughter; she's a good one and has been retained in the herd. Suarez is well-structured, solid on all fours, and continues to impress us with his performance. He has a great hair coat, with ideal colour, and carries that all-important money stripe on his face. Make sure to check him out when our videos come out at the end of January, guarantee you will be looking at him more than once. ~ **Hetero Polled** ~

This mating certainly worked well again. His full brother sold at last year's sale to Cypress Colony for \$16,000 and this is the third good January son this cow has contributed to our bull sale. He is only ten and a half months old in this picture and as you can see there is lots of bull here. He is super thick, wide topped with a heavily muscled rear quarter, solid structure, and lots of testicle. Score will be a real herd builder, injecting performance, style, and strong maternal values into the calves he sires. You will score "big time" if you select this guy as your next herd sire. ~ **Hetero Polled** ~

The consistency of these Gracie X Sysco embryos is unmatched. Stonehenge and his full brother below are carbon copies of each other. Ample length of spine and volume, great scrotal, and masculinity. 3 full brothers to Stonehenge averaged \$15,300 in our 18th annual bull & female sale. These Sysco sons are stamped with his unique muscling pattern, evident in that quarter. His sons have been high sellers for the past three years, and for good reason. ~ **Hetero Polled** ~

Another tremendous Sysco son with explosive growth to add power and performance to your next calf crop. Pictured here at a young age, you can certainly appreciate his thickness, deep quarter, overall balance, and big testicles too. His length of body is admirable, just calculate how much more your calves will weigh with an extra foot of length. His donor dam has been an awesome producer with twenty calves to her credit. Several of her daughters are working in the herd and her sons have been high sellers at past sales. Lots 13,14,82 and 83 are all full siblings showing their consistency and early maturing nature. You will drive a lot of miles to find a bull with this much potential. ~ **Homo Polled** ~

Scorch's blood-red colour alone grabs your attention when you walk into the pen. He steps out with ease on his solid structure and length of body. Born an 85-pound twin certainly doesn't appear to have affected his growth. His dam is a beautifully uddered American Red daughter out of our Code Red donor cow which guarantees she will produce a good one every time. Here is a bull that makes a statement with his many qualities and will add a ton of value to your next calf crop. ~ **Homo Polled** ~

Our leap-year bull born on Feb 29 and I just have to say that he has been growing by leaps and bounds. You would never know by looking at this soggy bull that he is the youngest bull in the sale. His high-priced dam was purchased at the Spring Creek dispersal with the intent of adding her to our donor program as soon as possible. We knew that the Sysco strengths would work very well with these superior maternal traits from his dam. Here is a solid bull with an excellent pedigree. Six-Pac is going to continue to impress us as he matures. ~ **Homo Polled** ~

This set of five Springcreek Sherlock brothers has us stoked. Purchased out of Springcreek's herd dispersal for use in our heifer pen, Sherlock has made himself a name. Imprinting his calves with ideal colour, extreme calving ease, and explosive growth. His semen sells as lot 101 here at the bull sale. Progress has mirrored his sire identically. Adequate muscling, blood red pigment, great shape, and a poised presence. His bottom side goes back to a strong line of production females. Females with big frames, absolute depth, and have met their expectations year after year. Progress's calving ease features, strong structure, and pedigree give him the potential to be a great heifer pen candidate. ~ Homo Polled ~

We are really impressed with these Sherlock calves; they come easy at birth and then grow like crazy. Prestige is the result of a Cinderella Man daughters first calf, and we sure appreciate the udder quality that all his daughters possess. His dam also has some of those predictable heavy muscling genetics from the Spartacus in her pedigree. Prestige is structured well, has a good thick hair coat, and a calving ease EPD of 15.7. We think his new owner will be happy with the ton of growth he will inject into the calves he sires. ~ Hetero Polled ~

This Sherlock son is more moderate leaning more towards his dam's body type. We only have two of these KT Hercules females and they are thick! After raising good first calves they both bred back on the first cycle, good fertility is something we all like to see. This bull has an incredible profile at this young age and is really going to mature into something! Very well balanced, good muscling, sound structure, adequate testicle size, great hair, colour, and a 15.8 calving ease EPD. He pretty much checks all the boxes, definitely worth checking out on sale day. ~ Homo Polled ~

Every once in a while, you pull some old trusted semen out of the tank. Crossroad Slapshot was a Reserve Champion King of the Ring back in the day and he sired some awesome calves for us. He was born in 2006 and after nineteen years we still have a few of his strong granddaughters working in the herd. We have a direct Slapshot daughter on offer in the heifer section, if you are looking for longevity and production be sure to check her out. Power Shot's dam is a moderate framed fertile Limitless daughter who is expecting her sixth January born calf. She has two fancy daughters working in the herd. Power Shot has some excellent traits that will be of interest to many, he is super stylish with his deep-bodied profile, great hair coat, colour, and a good temperament to boot! Just wait till you see him all muscled up by sale time, impressive to say the least. ~ **Homo Polled** ~

We are pleased to offer you five transplant brothers from our prolific producing Whisper cow. She was purchased from Ultra Livestock with the intention of using her as a donor and she has given us large numbers of quality embryos on multiple flushes. Her first calf was Crossroad Playboy who was a high seller at last year's bull sale. He has matured into an incredible specimen and we will be incorporating his genetics into the herd this year. The next five lots have everything you could want when choosing your all-important next herd sire. As you can see in this early December picture, Crusader is proud in his stature, showcasing exemplary pigment, ideal frame size, and faultless structure. Be sure to watch this bull's videos or come tour the pens, we think you will like him even more than the picture. ~ **Hetero Polled ~ Diluter Free~**

Great colour and a docile temperament on this large framed, strong-musled Creed son. The Whisper donor dam has a very desirable udder and we are excited to move forward with the four exceptional transplant sisters from this same flush. We can see that they have the potential to be foundation females as we continue building this new cow family keeping the full blood division of our herd strong. There are a number of high profile bloodlines in this pedigree, guaranteed to produce. ~ **Diluter Free~**

Undoubtedly the deepest sided of these flush brothers, Campaign is one to admire for his thickness throughout. Heavy-boned, excellent structure, and square-hipped, he is one we sure like. Excellent testicle development on all these Creed sons when we measured in early December and strong maternal values in these bloodlines too. We think any of these brothers are the kind to build a cow herd around and sons that the industry craves. He will be a real contender on sale day for you to consider. ~ **Hetero Polled ~ Diluter Free**~

Sired by the proven Harrach and a superb uddered, very productive dam whose son sold to Cypress Colony last year. We have sold several high-priced Harrach sons and daughters over the years and continue to use a sprinkle of his genetics knowing the quality he sires. This guy will mature into a lot of bull injecting a predictable outcome to his calf crops. ~ Diluter Free~

Brooks Brigade is a homo polled bull we purchased and used on all types and ages of cows and we are sure pleased with the results. Bonafide is going to be quite a bull when he matures. He has a lot of eye appeal with his great colour and markings. More than adequate muscling, masculine presence, and comes with ideal testicle size too. His maternal side is from a strong cow family that has raised some of our best. Bonafide will add some real quality to the calves he sires. ~ Hetero Polled ~ Diluter Free~

We AI to this bull's sire from time to time for his calving ease and extraordinary colour and quality. This fancy Dexter son was born unassisted to a heifer at 70 pounds and is showing good calving ease features, short gestation, a smooth shoulder, and a calving EPD of 16.0. His young homo polled dam did a real good job feeding him and bred back again for January. Structured well, adequate muscling at this stage of his growth, and large testicles round out his credentials that are well deserving of a spot in the bull sale this year. ~ Diluter Free~

ACCI HUSTLER 2N  
TSZ ECLIPSE 502Y

Another versatile 30-06 transplant son, his recipient dam fed him well to get him from 70 pounds at birth to 810 at weaning. He is very attractive through his sleek skull shape carried throughout his well-balanced frame. His donor dam is the twelve year old TSZ Keepsake cow who has given us so many good sons and daughters and she is not done yet. The daughters Black Fortune sires will be highly productive and his heavy weight sons will be in high demand. ~ **Homo Polled** ~ **Hetero Black** ~

We should be calling this bull Black Superstar; he boasts an impressive set of EPD'S with 11 out of 13 in the above average category. He is big-footed, notable testicle development, and has an impressive hair coat to top it off. He is a touch more compact which is no surprise coming from an extremely thick moderate Madoc sired dam. She has placed two daughters in the herd, and another heifer was born on January 1st. There are a number of high-profile producers in this bull's pedigree, combining cow families that have cranked out some of our very best. This guy will more than likely sire some of your very best too. ~ **Homo Polled** ~ **Hetero Black** ~

Born a twin to a cow we had purchased from Maxwell Simmentals that has been an excellent producer. One of her fancy daughters was purchased at the Border City sale in December by Beechinor Bros. Here is another thick-haired, excellent-skulled, solid-footed 30-06 son. A bull that when broken down is extremely solid in his make. Balanced with great rib shape, length of spine, and structure that's hard to knock. ~ **Homo Polled** ~ **Homo Black** ~

Black Sonar is a transplant brother to lots 13, 14 & 83, all with the same pedigree just a different colour, and fed by different mothers. We have half a dozen full sisters in the replacement heifer pen and another group that are due with their first calves. His Sysco sire needs no introduction, sons have been high sellers since his first calf crop arrived. His fertile donor dam has produced a large number of embryos and has twenty-one calves to her credit so far. Here is Black Sonar, early maturing, jaw-dropping rear quarter like his sire, full of real qualities here that are not easy to find. Be sure to check out his video that will be online in early February and better yet come to the sale and see for yourself, guaranteed he will mature into an excellent herd bull. ~ **Homo Polled** ~ **Hetero Black** ~

Just like her sire. Marlo's build screams brood cow, and an exceptional one at that. A Westcott granddaughter, with Sysco on the top side, she is full of promise. Pronounced muscling, defined capacity, and maximal length of body. Her dam is a tank of a female, with a strong solid foot and impeccable udder. Marlo's future is bright with her load of admirable attributes. ~ **Homo Polled** ~

A compact little package here. Myrna exhibits ample capacity, muscling and a great hair coat. Her dam is a complete made Killswitch daughter with a commendable udder. Her IPU Top Tier sire certainly had his influence on this daughter. Giving her adequate muscling, power, and a strong foot. ~ **Homo Polled** ~

We figured there was no better opportunity to offer the first semen packages on Springcreek Sherlock than here, alongside his stunning set of sons and daughters on offer. Purchased out of Springcreeks dispersal as a 10-month-old, Sherlock has effortlessly secured his place in our bull battery. His dam, Springcreek Amanda 35F was the selling feature for us. Breathtaking in her build, refined skull, grand extension, sound foot, and a worthy production record. Sherlock's outstanding set of EPDs caught our attention, a calving ease of 21.2 ensured fail-safe calving on heifers. Much like his Shamrock sire, the calves come out small with plenty of vigour. What distances him is the shocking growth rate of the calves as the days go on. It truly was the cherry on top. The five sons and two daughters on offer are a consistent set across the board. Ideal pigment, great shape, muscle, and EPD profiles that only make them stronger. The Sherlock bull himself is a sight out in pasture. Long spined, clean skulled, deep chested, and his pigment couldn't be better. We are pleased to share his genetic combination of excellence with the industry.

A bull we feel has lived in the shadows for too long. Silver Lake Jenner is the POLLED full brother to Silver Lake Jackson, who recently resold for a whopping \$100,000 at the World Congress Sale. Brothers born to the prolific Farrah cow. A High Noon daughter that has caught the attention of many for her vast power, flawless udder, and production record. Their Darwin sire continues to produce high valued progeny with ideal colour, mass of body, and impeccable feet. Jenner himself exhibits ample length of spine, superb markings, a strong sound foot, and well rounded muscling throughout. His progeny averaged \$26,000 this year, with a high selling daughter going to Anchor D Ranch Simmentals. He's one that's thoroughly proven through his pedigree, phenotype, and progeny on the ground.

## Terms & Conditions

**TERMS** – The terms of the sale are cash or cheque payable at par at sale location unless satisfactory credit arrangements have been made prior to the sale. The right of property shall not pass until after settlement is made.

Crossroad Farms reserves the right to require a certified cheque as settlement before releasing any sale cattle. Should the purchaser fail to settle for his purchase Crossroad Farms reserve full power to resell the animal to the best advantage either publicly or privately, without further notice. Any loss arising from such resale together with keep and all other expenses shall be payable by the defaulter. All settlements must be made with the clerks of the sale before any cattle will be released. Crossroad Farms and sales staff has the right to refuse bids from anyone who has a previous record of default in payment and who has not made prior credit arrangements, prior to the sale with Crossroad Farms.

**BID** – Every animal consigned to the sale must be sold by auction. No by bidding will be permitted. Each animal will be sold to the highest bidder.

**DISPUTES** – In case of disputes, bidding will be reopened between the parties involved. If no further bid is made the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

**PURCHASER'S RISK** – Each animal becomes the risk of the purchaser as soon as sold.

**ANNOUNCEMENTS** from the auction block will take precedence over printed matter in the catalogue. Buyers are therefore cautioned to pay attention to any such announcements.

**CERTIFICATE OF REGISTRY** – The proper Registration or Recordation paper, as the case may be, will be duly transferred and furnished to the buyer for each animal after the settlement has been made.

**SHIPPING** – Assistance will be given in making shipment after the sale but no risk is assumed by the Seller. Purchasers are requested to furnish shipping instructions when making settlement.

**GUARANTEE** – All animals will carry standard breeding guarantee as specified by the Canadian Simmental Association. At no time shall the seller's liability exceed the purchased price of the animal.

**EXCEPTION TO GUARANTEE** – In cases where the animal is subjected to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void. In the cases of bulls, they are guaranteed to breed naturally according to the Canadian Simmental Association Guarantee but no guarantee is given that semen from any bull will freeze.

**HEALTH** – All animals will have passed the required tests as determined by Agriculture Canada at sale location. It is the buyer's responsibility to determine health requirements for importing any animal into his province or state.

**ACCIDENTS** – Although every precaution will be taken to protect the safety and comfort of buyers, neither Crossroad Farms or any Sales Staff or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

**RIGHTS AND OBLIGATIONS** – The above terms and conditions of the sale shall constitute a contract between the buyer and the seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.

**PICTURES** – By attending our sale you are giving your consent for your picture to be taken and used for promotional or advertising purposes only of Crossroad Farms. If you wish to not have your picture used please advise us in writing immediately after the sale.

Return undeliverable covers to:
